

# VENTURI

## IJIVP - VENTURI

The new venturi injectors, with the renewed technical design, widen Irritec range for the in line injection of fertilizers.

Available in the sizes 3/4" - 1" - 1 1/2" - 2", built with materials of high mechanical and chemical resistance, they assure the regular distribution of fertilizers in the irrigation system. Precise and efficient, they need a small pressure difference to assure a high aspiration performance. Irritec finds the correct equilibrium between technique and practicality in the simplicity of the physical principle, designing a secure and efficient injector.

### Installation

#### by pass with pressure regulator

#### by pass with suction pump

#### by pass with pressurized pump

#### on line

- 1 INJECTOR
- 2 METERING VALVE
- 3 FILTER
- 4 ELECTRC PUMP
- 5 PRESSURE GAUGE
- 6 PRESSURE REDUCTION DEVICE

- A INLET PRESSURE
- B OUTET PRESSURE
- C INLET FLOW RATE
- D SUCTION FLOW RATE

Inlet pressure bar	INJECTOR 3/4"			INJECTOR 1"			INJECTOR 1 1/2"			INJECTOR 2"
